Illinois Solar + Battery VPA

Power program offered through SOLRITE · Roof & solar installation by Cox Roofing & Restoration

A BETTER WAY TO DO ENERGY IN ILLINOIS

$0 down. Storage-first solar. One predictable rate.

$0	12¢	60
UPFRONT EQUIPMENT & INSTALL	PER KWH SOLAR RATE	KWH DURACELL BATTERY INCLUDED

EVERYTHING INCLUDED

- ✓ Custom solar system designed for your roof
- ✓ 60 kWh Duracell battery — storage-first design
- ✓ Backup power for essential loads when the grid drops
- ✓ Professional installation by licensed crews
- ✓ All maintenance, monitoring & repairs covered
- ✓ 12¢/kWh rate on solar generation under the VPA agreement

Available in Ameren and ComEd territory. Equipment is owned and maintained by SOLRITE. Rate and program subject to credit approval, site conditions, and **VPP Program Addendum**.

Solar rate applies to generation under the Solar + Battery VPA. Not a purchase — different from cash/loan PPA options your rep may also discuss.

POST-2025 ILLINOIS

The credits got cut. The battery is the strategy.

New Ameren and ComEd solar customers no longer receive full 1:1 retail credit for exports. Exported energy is credited roughly against supply & transmission (~8–11¢/kWh), not delivery — worth about a third of the old value. Self-consuming and storing solar beats sending it to the grid for pennies.

1 · Daytime runs on solar

Central & southern Illinois averages strong peak sun hours; panels perform well in cold weather. Midday surplus charges your Duracell battery instead of relying on low-value export.

2 · Battery captures the rest

60 kWh storage holds excess production for evening use at the full retail equivalent — power you would otherwise buy from the utility at rising supply rates.

3 · Grid services help fund the system

The battery can participate in a Virtual Power Plant (VPP), providing grid services that generate revenue — part of how SOLRITE's $0 upfront Solar + Battery VPA is structured (see VPP Addendum).

Utility supply rates have climbed; summer peaks can approach **~20¢/kWh** and trend upward. Your **12¢/kWh** solar rate under the VPA is designed for predictability — paired with battery self-consumption in post-2025 Illinois.

COX SOLAR SOLUTIONS

Where we offer the VPA

SOLRITE program · Cox Roofing installation partner

ILLINOIS SERVICE AREAS

Chicago metro · Springfield · Peoria · Bloomington · Champaign · Decatur · Metro East · Carbondale

Ameren and ComEd territory · Program availability subject to confirmation for your address.

Already have solar? Battery VPA

Add a Duracell battery for **$0 upfront** under the Battery VPA. Pre-2025 grandfathered homes: backup power plus protection if 1:1 net metering rules ever change. Post-2025 homes: capture solar for self-use instead of low export credits. You keep your existing utility plan.

Powered by Duracell storage

LFP battery system with high-efficiency hybrid inverter; stackable modules up to **60 kWh** typical for this program — garage or basement wall space. Built for backup and VPP participation from day one.

Duracell® is a registered trademark of its respective owner. Equipment specs per SOLRITE engineering package.

Incentives & ownership

Under a third-party VPA, RECs, rebates, or tax attributes may be assigned to the program owner per your agreement — not all incentives go to the homeowner. Ask your rep for your specific proposal. Cox installs; SOLRITE owns and maintains qualifying VPA equipment.

Questions? Cox Roofing (773) 308-6115 · Oak Brook, IL · COXROOF.COM · Program support: SOLRITE per your agreement. Eligibility, rates, and terms may change. Not tax or legal advice.

Palmetto LightReach™ Energy Plan

PPA or lease (by state) · Installed by Cox Roofing · Owned & serviced by LightReach

THIRD-PARTY OWNERSHIP · PAY FOR POWER, NOT PANELS

Go solar with $0 upfront and a predictable energy rate.

$0	25	Protect
UPFRONT INSTALL COST	YEAR ENERGY PLAN	MONITORING & MAINTENANCE INCLUDED

WHAT HOMEOWNERS GET

- ✓ Custom solar design sized for your home and usage
- ✓ Permits, installation, and interconnection handled by your Cox crew
- ✓ Energy priced at a **discount to your utility rate** (PPA: per kWh; terms in your agreement)
- ✓ LightReach owns the system — you buy the power it produces
- ✓ Proactive monitoring; maintenance & repairs covered under Protect
- ✓ Potential savings from day one vs paying full utility supply rates alone

Cox Roofing is your installer. **Palmetto LightReach** (Palmetto Solar, LLC) is the program owner and service provider. You may receive both a **utility bill** (grid use) and a **LightReach bill** (solar energy).

Savings not guaranteed. Rate, escalator, and product form (PPA vs lease) depend on state law and your approved proposal.

Protect & PPA basics

25-year coverage · Production guarantee · Life of home

Protect package (included)

- **90% production guarantee** (where offered per agreement)
- 25-year panel & inverter warranty
- 25-year workmanship warranty
- 10-year roof penetration warranty
- 24/7 production monitoring & support

PPA mechanics

- Pay per kWh for solar power produced
- Rate set below utility energy rate at signing
- Annual escalator on ¢/kWh per contract
- 25-year production forecast in your agreement
- Qualification required; terms in LightReach docs

CHOOSING A PROGRAM

LightReach PPA — Classic third-party ownership; strong Protect warranties; great for $0-down and pay-for-power nationwide (MO, IL, and other eligible markets).

SOLRITE VPA (IL) — Solar + 60 kWh battery; fixed solar rate; storage-first for post-2025 export rules (earlier pages in this booklet).

Home sale — LightReach plans can often transfer to the buyer. Buyout options may be available in later years per your agreement.

Tax credits, RECs, and incentives may belong to the system owner under third-party agreements. Cox Roofing does not provide tax or legal advice — review your LightReach contract and ask your rep.

Palmetto LightReach™ and related marks are property of their respective owners.

WHAT WE DO

You provide your roof and only pay for the power your system produces. We take care of everything else.

DESIGN · PERMITS · INSTALL · MONITORING

COX SOLAR SOLUTIONS

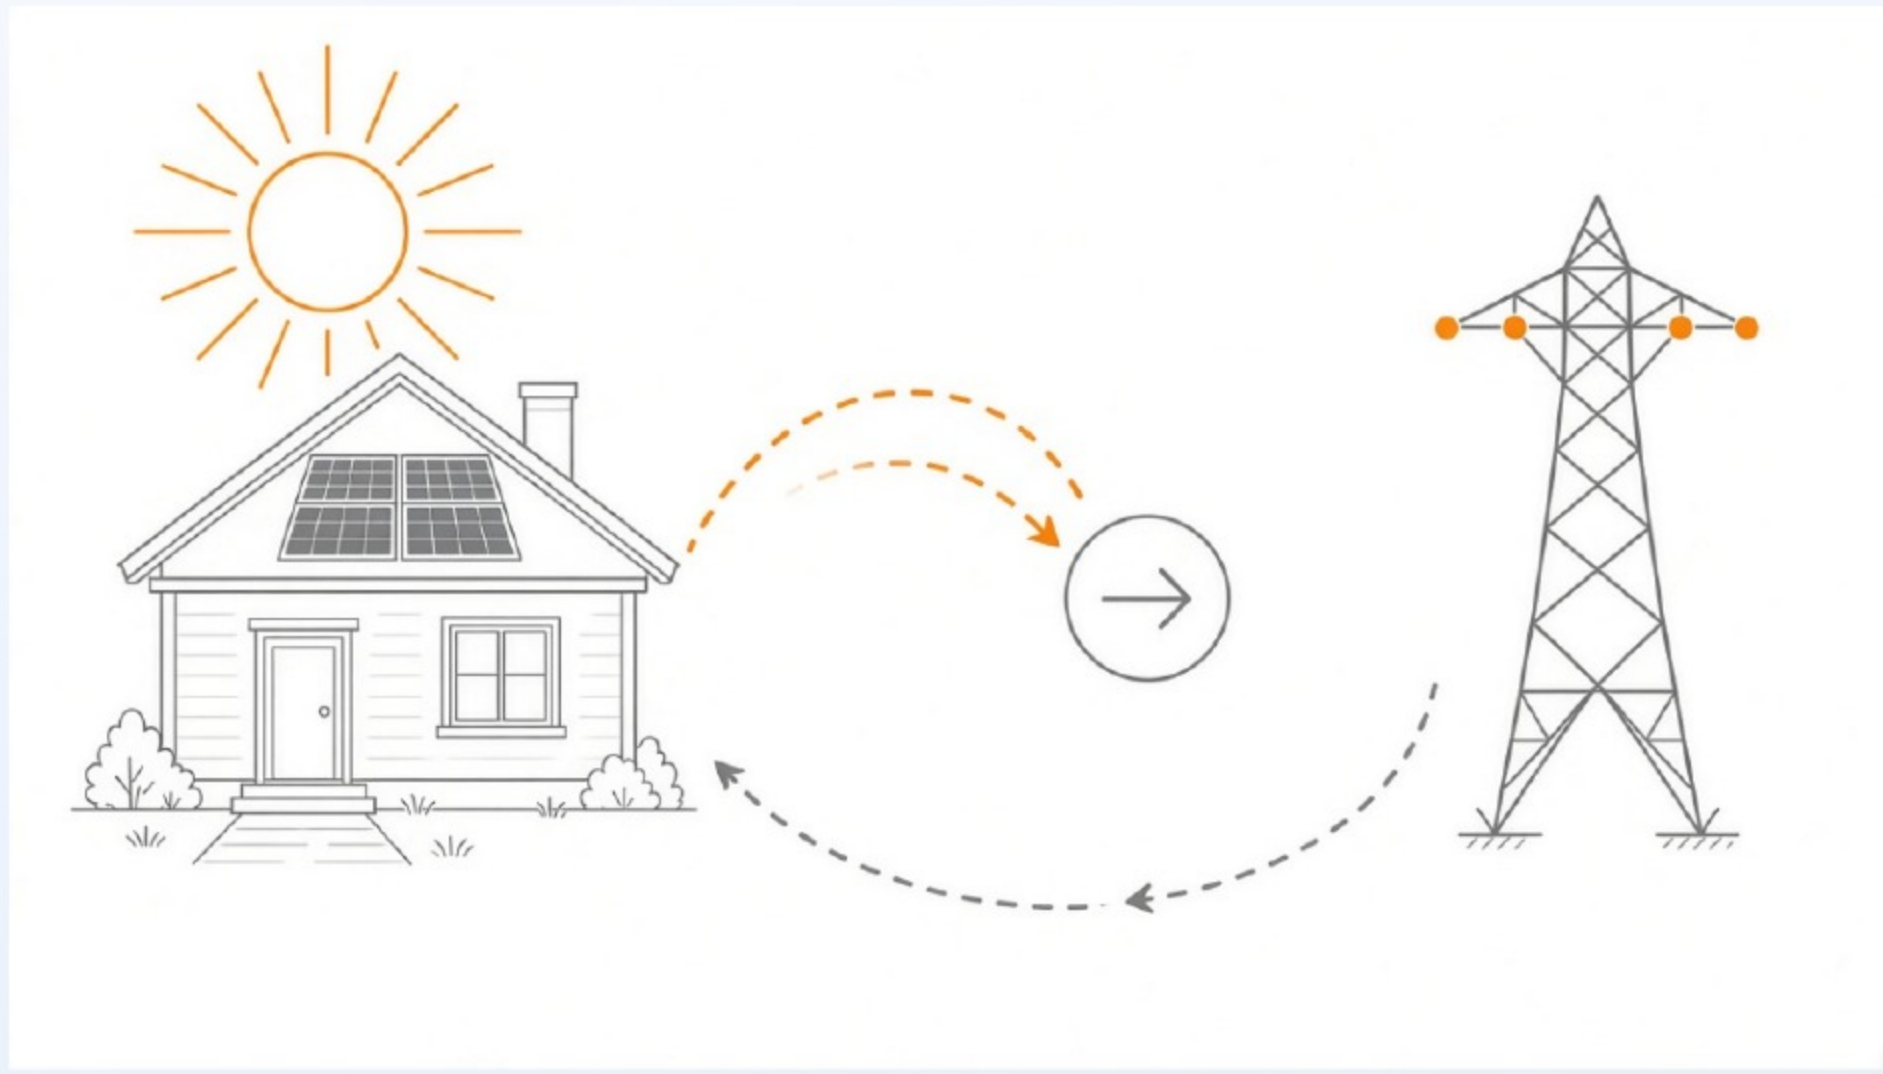

Net Energy Metering Program

Lower your bill with the energy your solar system produces every month.

Any surplus power your home does not use is sent to your utility's grid. You are credited for that surplus power on **12-month cycles** (rules vary by utility).

Illinois (2025+): Export credits for new customers are lower than legacy 1:1 net metering. Many homes benefit from **battery + VPA** self-consumption — see the SOLRITE VPA pages in this booklet.

HOW ENERGY FLOWS

Illinois solar incentives

Chicagoland & ComEd territory — confirm eligibility before quoting.

Illinois Solar for All (ILSFA)	Rebate	Income-eligible households (at or below 80% AMI) receive no-upfront-cost solar with at least 50% savings on the value of energy produced.	More
ComEd DG Smart Inverter Rebate – Solar	Rebate	ComEd customers receive a $300-per-kW upfront rebate for installing solar with a smart inverter.	More
ComEd DG Smart Inverter Rebate – Battery	Rebate	$300 per kWh cash rebate for battery storage with a smart inverter; qualifying rate plan required.	More
Virtual Power Plant (VPP) – Battery	Rebate	CRGA-mandated VPP (by June 30, 2026): residential battery customers can earn the DG rebate by allowing utility dispatch during peak events.	More
IL Net Metering / Smart Solar Billing	Net metering	Legacy systems (before Jan 1, 2025) receive full retail-rate credits; new systems receive supply-only credits under Smart Solar Billing.	More

Illinois & Chicago programs

Net metering, property tax, and permit benefits.

IL Net Metering / Smart Solar Billing	Net metering	Legacy customers (systems installed before January 1, 2025) receive full retail-rate credits; new customers receive supply-only credits under Smart Solar Billing.	More
IL Solar Property Tax Exemption	Tax	Added home value from a solar installation is exempt from property tax assessments for 20 years.	More
Chicago Solar Express Permit	Rebate	Expedited permitting for Chicago homeowners with a flat $100 savings on permit fees.	More
Chicago Green Permit Program	Rebate	Priority permit review and reduced fees for qualifying green and solar installations.	More
